Coursework: Intermediate Microeconomics; Intermediate Macroeconomics; Econometrics; Game Theory; Financial Economics; Environment Economics

PROFESSIONAL EXPERIENCE

Sinolink Securities Co., LTD. Shanghai, China

Intern, Retail Business Department Jun. 2019 - Aug. 2019

- Analyzed stock market performance and collected daily information–including macroeconomic indicators, market volatility, and policy regulations–to predict market trends and draft market monitor reports.
- Edited and published daily investment prospectus on company's official WeChat account to provide professional advice to investors.

RESEARCH EXPERIENCE

The University of North Carolina at Chapel Hill Chapel Hill, NC

Research Assistant for Prof. Franklin Qian July 2022 - June 2023

- Used Stata to categorize different institutional buyers in the U.S. real-estate market for further analysis of institutional buyers' behaviour of holding, purchasing and selling.
- In order to find the link between transaction behaviors and neighborhood characteristics, I used Stata to merge tract-level characteristics data with tract-level real-estate transaction data. This also required me to crosswalk 2000s data to 2010 vintage.
- To detect potential relationships between investor buyers' market share and neighborhood characteristics, I used Stata to construct zipcode-level panel data in the U.S. between 2000 and 2019 for further LASSO regression. I also research on the spatial concentration of institutional buyers' market share growth with this dataset I constructed.

Duke University Durham, NC

Research Project with Hannah Marsho and Yuqi Zhou Mar. 2022 - May 2022

- Paper name: *Gender Discrimination in the Chinese Hiring Process*
- Used a DiD model to estimate the Chinese policy's (prohibiting interviewees to ask about interviewer's marital status and willingness to give birth) effect on women's probability of employment.
- Found that this policy has little effect on the probability of employment for young women but increases that for older women by 6.1 percentage points.

Duke University Durham, NC

Research Assistant for Prof. Ofer Eldar and Prof. Micheal Wittry Feb. 2022 - Nov. 2023

- Reviewed legal documents to organize poison pills according to their provisions and analyze the evolement of poison pills over the past two decades.
- Analysed financial news to identify when a company adopted a poison pill, as well as the rumors that preceded this merger and acquisition. This enabled me to illustrate the causal inference between the rumor of merger and acquisition and the final adoption of the poison pills.

Peking University China Center for Public Finance Beijing, China

Research assistant for Prof. Lin Shuanglin Jun. 2020 - Aug. 2020

- To identify problems in rural Chinese medical systems, I placed tax, medical care, and social care policies in a time-series. This enabled me to suggest possible medical reforms.
- To evaluate the effectiveness of past medical reforms in rural China, I designed a difference-in-difference model with STATA. This model can provide insight for future medical reforms.
- Edited both the Chinese and English versions of the textbook *China's Public Finance: Reforms, Challenges and Options*. The textbook outlines the challenges facing China's public finances and is used by students at Peking University.

Peking University & China Central Television Beijing, China

Research assistant for Prof. Hu Dayuan Jan. 2019 - Feb. 2019

- Devised and distributed questionnaires to 80, 000 residents in order to collect data concerning residents' personal economics (income, occupation, property ownership, sense of happiness).
- Drafted a report outlining the findings and used Tableau to visualize. The report later aired on China Central Television News.

SKILLS

Languages:

Mandarin (Native); English (Fluent) (TOEFL: 111; GRE: 162+170+4; TEM-4: 90; TEM-8: 80)

Computer:

R; Stata; SQL; Python; LaTeX; Tableau; Microsoft Office (Word, Excel, Powerpoint)
